TANDEM SKYDIVE

Overview:

Tandem skydiving allows you to experience freefall on your first skydive! Arrive 30 minutes prior to your class time for orientation. Training begins at the scheduled class time. In the 30 minutes of training you will learn about the equipment safety features, how to easily exit the aircraft, FLY your body through the sky and the best way to make your landing. After ground training, you'll "gear up" and board the aircraft for an amazing 15-20 minute scenic flight. One last safety check and you will make your first skydive with your instructor and experience up to 60 seconds of PURE exhilaration! The experience concludes with a surreal, 5 minute parachute flight back to our landing area where you are presented with your personalized, First Skydive Certificate.

Tandem Skydive Altitudes & Extras:

Basic Tandem Skydive - \$225

-Experience 30-45 seconds of freefall.

Double the FREEFALL upgrade - \$25

-Upgrade your adventure and experience up to **one full minute of freefall excitement!** (Extra altitude options subject to weather conditions)

Professional DVD - \$90

-Your DVD will include **priceless footage** of your entire experience including pre-jump, flight to altitude, freefall experience, canopy flight, & landing. Your documented experience is then professionally edited, where we add music and personal touches.

The DVD is a must-have for your first skydive and allows you to relive the experience over and over.

STATIC LINE SKYDIVE

Overview:

Static line skydiving is a more self-reliant method for making your first skydive. Arrive 30 minutes prior to your class for orientation. The static line experience begins with a five hour ground class, training you in the basics of skydiving, the equipment used, and how to properly operate the equipment. Weather permitting, the class is followed by equipment gear-up and inspection. Next, board the aircraft with an instructor, fly to altitude, and exit the airplane wearing your own skydiving equipment. The parachute will deploy automatically via the static line. Through radio communication with a ground instructor, you will fly your parachute back to our large student landing field.

Static Line Skydive Altitudes & Extras:

Basic Static Line Skydive - \$200

-Experience a 4-5 minute parachute flight.

"Mile High" upgrade (5,280 feet) - \$25

-Double your parachute flight time & gain more experience piloting the parachute (Extra altitude options are subject to weather conditions.)

FREQUENTLY ASKED QUESTIONS

How long will I be at the drop zone for my skydive? For a tandem skydive experience, plan on 3 to 4 hours. For static line class and skydive, plan to spend your entire day at the drop zone.

Can I buy a gift certificate?

Gift certificates are available for any of the experiences we offer, or in a denomination of your choice. Order by phone with MC or Visa payment. The skydive is scheduled later by the recipient.

What do I wear?

Wear comfortable clothing and athletic shoes that lace. No shoes or boots with heels or "quick lace" type hooks. Jumpsuits will be available, or you can jump in street clothes.

What will the skydive feel like?

The sensation of freefall feels more like flying than falling. Once the parachute opens, the flight is quiet and the view is breathtaking and exhilarating.

How long does the skydive last?

A tandem skydive will consist of 30 to 60 seconds of freefall, (depending on your exit altitude) followed by a 4-5 minute parachute flight.

On a static line skydive, your parachute will be inflated 5 seconds after you leave the airplane, and from there you will enjoy a 5-6 minute flight.

How does the extra altitude benefit me?

On the Tandem Skydive, you will **DOUBLE** your freefall time from 30 seconds to 60 seconds! The additional free fall time is almost like getting another skydive for only \$25. The static line extra altitude provides an extra 3 minutes for you to fly the parachute. We highly recommend it!

Who will be training me?

United States Parachute Association (USPA) rated Tandem and Static Line Instructors will conduct your training at our USPA-approved drop zone.

Are Group Rates available? YES!

4-6 students: \$10 off each person

7-9 students: \$15 off each person

10+ students: \$25 off each person

Due to volatility in fuel prices, all prices subject to change without notice.
